

Speed and convenience. The best self-service juice option for your establishment.

- Automatic juicer for citrus: Oranges, lemons, limes, mandarins, and grapefruit.
- The machine uses a squeezing system that is unique in the world, cutting the fruit in half and squeezing it without the juice coming into contact with the peel, this means the juice does not pick up any of the oil or bitterness in the peel, so what you get is top quality, 100% pure, natural tasting juice.
- All our machines are constructed with a stainless steel body.
- Top-mounted rotating basket that is part of the automatic feed system. The basket holds up 20 lbs of fruit and when full makes the machine visually attractive.
- Latest generation Digital Programmer and fruit counter for monitoring the number of fruits squeezed, plus a digital display screen that provides information on the machine's operating status.
- Z14C juicer with 1.6 gal capacity tank for receiving the juice and a self-service tap.
- Stainless steel waste peel collection cabinet. Waste bin bag.
- Drip tray and grille can be set at 3 different heights.

Fruit size:

Medium-size cup kit Ø 2.16" - 2.95"
Large size cup kit Ø 2.75" - 3.54"

Ideal

- For retailers serving more than 50 juicers a day in a short period of time.
- Heavy level of consumption.
